 London WC1A 2RA (GB)**

(71) Applicant: **HEWLETT-PACKARD COMPANY  
 Palo Alto, California 94304-1181 (US)**

(54) **Security of remote computing devices**

(57) A management information system (11) provides protection for a remote computer (16-21). When a determination is made to invoke protection of the remote computer (16-21) the management information system (11) contacts the remote computer (16-21) using a communication path (10,12-15,22). The management information system (11) instructs the remote computer

(16-21) through the communication path (10,12-15,22) to perform an action to protect the remote computer (16-21). The remote computer (16-21) performs the action to protect the remote computer (16-21). For example, the action is to lock the remote computer (16-21) to prevent unauthorized use. Alternatively, the action is to erase or encrypt data within the remote computer (16-21) to prevent unauthorized access to the data.
